SUBJECT: Fountain Residence, 15 Pettit Road, South Salem, NY 10590  
DATE: July 12, 2022

---

The Conservation Advisory Council (CAC) has reviewed the materials submitted by the applicant restoration of a pond.

The CAC believes that the plan submitted by the applicant for the restoration of a pond is quite well thought out. Because the pond is next to the road and the input to the pond goes under the road, there is the possibility that the silt being removed has some contamination from salt, oil or gas. As the plan is to spread the silt on the ground in the buffer, the CAC would like to see the silt tested.

Top soil in the area where the dredge spoils are to be deposited should be scraped back so it can be used to cap the spoils. These areas should be seeded immediately after being top-soiled to prevent the establishment of invasive species near the wetland.
