DATE: May 8, 2018

The Conservation Advisory Council (CAC) reviewed the applicant's recent submission documents and plans from April 2018. The CAC continues to have the concerns stated in the memo date November 12, 2017.

However, based on the recent submission, the CAC offers the following comments:

- 1) the wetlands mitigation plan and the storm water pollution prevention plan appear to address the CAC's concerns
- 2) the Planning Board and the NYC DEC are tracking the same concerns.

Having stated that, the CAC has no additional comments.
