

Wild Animal Report

The Town Clerk's office is now required by State law to collect information regarding the locations in Town where wild animals are being harbored. Information required includes the name, address, and emergency contact numbers of every person or business where wild animals are harbored. The information must be reported annually, no later than April 1 of each year. The information collected will be forwarded to the Town's emergency services personnel.

The New York Department of State, in consultation with the State Department of Environmental Conservation has developed a list of common names of wild animals to be reported.

Anyone in Lewisboro harboring a wild animal as classified by the State is required to fill out the form, or contact my office at 763-3511 or email to townclerk [at] lewisborogov.com
