

Mead Street Stormwater Retrofit Project

News Release Date
04-13-2015

****NOTICE ****

Mead Street Stormwater Retrofit Project

Town of Lewisboro

April 13, 2015

Dear Resident,

As you know, construction of the Mead Street Stormwater Retrofit Project is well underway.

Please take note that during the week of April 20, 2015, the Contractor is scheduled to commence installation of a new stormwater pipe, replacing the existing pipe beneath the entrance

to Tarry-A-Bit Road. This work will require trench excavation through the existing asphalt apron. The Contractor will complete the road crossing in a timely fashion and will maintain continued access through Tarry-A-Bit Road with the use of temporary steel road plates until the new pipe can be installed and backfilled. A new asphalt apron will be installed at a later date.

Thank you for your continued support and cooperation in the completion of this project.

Very truly yours,

Joseph M. Cermele, P.E., CFM

Kellard Sessions Consulting, P.C.

Consulting Town Engineer
